## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohmura US4215504.
- 3. Regarding claim 1, Ohmura discloses a circular ring 12 on one end; the circular ring having two opposite sides of the perimeter extended downwards to form a vertical section (see orientation in fig 2); the vertical section having a distal end 15 extended outwards and downwards and bent inwards to become narrower so as to form an inclined conical section 13 which has a horizontal plane16 at one end; the horizontal planes of two sides being symmetrical and joined juxtaposed to form a flat and conical fastening section; the circular ring 12 further having a lower end 17 extending downwards to form an arrow shaped fastening section 18 opposite the conical fastening section.
- 4. Regarding claim 2, Ohmura discloses the inclined conical section 13 has a vertical surface to form a surface contact with the fishing line (at bottom portion of element 12).
